

The Industrial Choice.

The background of the entire page is a close-up, high-angle photograph of a large industrial fan. The fan has multiple blades radiating from a central hub. The lighting is dramatic, with strong highlights and deep shadows, creating a sense of depth and industrial scale. The color palette is dominated by dark greys and blacks, with a prominent red glow emanating from the fan's center and blades, which also serves as the primary color for the logo and tagline.

INDUSTRIAL AIR MOVING EQUIPMENT
Company Profile

THE INDUSTRIAL CHOICE

As the recognized leader in the field of industrial air moving equipment, Aerovent has earned a reputation for quickly adapting to the needs of the industry. Years of active research and industry experience has allowed us to continually find solutions for the most demanding air movement applications. In addition to our industrial products, Aerovent offers a full line of commercial ventilation equipment. We are one of the fastest growing manufacturers of air moving equipment in the country. We believe this is due to the combination of the fans we manufacture and the “can do” attitude of the Aerovent team.

Since 1926, we have been supplying fans to industries covering most Fortune 500 companies, as well as small and medium sized companies that demand high quality products with innovative features. So whether your application requires a simple exhaust fan or a complete ventilation system, we have you covered. Because when it comes to industrial fans, no other manufacturer offers more than Aerovent...that's why Aerovent is *The Industrial Choice*.

CUSTOMIZED SOLUTIONS

With an unmatched variety of axial propellers and centrifugal fan wheels, every fan is customized to your specific needs. Our product line consists of a diverse range of distinct FAN and AIR HANDLING UNITS. We offer a wide choice of materials for specialty applications including fiberglass, stainless steel, aluminum, hot dip galvanized steel, abrasion and spark resistant alloys, along with numerous protective coatings. This comprehensive selection of products and materials makes Aerovent the ideal choice for most industrial applications such as turbine engine exhaust, foundry ventilation, paper mill processing, power plant boiler house ventilation, waste and water treatment plants, and countless OEM applications. When you choose Aerovent as your fan manufacturer, rest assured we have the right fan to meet your exact requirements.

SERVICE & SUPPORT

As a company devoted to our sales representatives, we extend our full support in every facet of the business – from selecting the right fan for your application prior to the sale to start-up and preventative maintenance services after the sale. With the most knowledgeable and experienced sales force in the industry, we are committed to providing the necessary assistance needed to tackle the most rigorous applications. Our representatives offer industry-leading customer service and are well-versed in the specifying and budgeting process. Many of our representatives are on their second and third generation of doing business with Aerovent.

We support our representatives with factory trained service technicians, an attentive customer service department and knowledgeable sales application and design engineers. In addition, we have created valuable time-saving tools, such as our Fan Selector Program, with fan selection, pricing and electronic order submittal capabilities. Our website also contains an Online Order Status feature, which allows orders to be viewed and sent via the Internet. In addition, our Ship-Out-of-Stock Program allows standard fans to be shipped within 48 hours. By continually investing in our representative sales force, they are enabled to provide you the best fans and service available.

QUALITY MANUFACTURING

By utilizing the highest quality materials, the most advanced equipment and manufacturing techniques, our product quality is unsurpassed in the air moving industry. We operate five manufacturing facilities across the U.S. and strive for the highest quality at every step of the manufacturing process – fabrication, welding, machining, painting, assembly, testing and crating. Our veteran team combines a unique skill set and craftsmanship to build the best fans possible.

Prior to manufacturing, all of our products are tested and validated in our in-house AMCA registered test laboratory. We conduct numerous types of tests for quality assurance, product certification and safety to ensure our fans and air handling units meet or exceed our own stringent standards.

AGRICULTURAL

INDUSTRIES SERVED

By staying at the forefront of product development, our full line of products accommodate a diverse and unique range of applications from OEM propellers to custom designed air handling units. Our air moving and ventilation equipment can be found throughout Power Generation, Agricultural, Automotive, Pharmaceutical, Air Pollution, Chemical, Marine, Water Treatment and Petrochemical facilities, just to name a few.

Our broad range of technologies and expertise has allowed us to provide the most innovative products in the market. All of our air moving and ventilation equipment is designed to allow for maximum flexibility and can be easily adapted to meet virtually any requirement. With such a diverse array of product offerings, finding the right solution has never been easier. Aerovent... *The Industrial Choice.*
