

**FOR IMMEDIATE RELEASE**

## **Aerovent Launches the GridSmart™ Variable Frequency Drive**

**Minneapolis, MN (May 12, 2016)** - Aerovent is proud to introduce our new line of **GridSmart™** Variable Frequency Drives (VFD). The **GridSmart™** VFD ushers in a new line of products, positioning Aerovent as a leader in fan efficiency among fan manufacturers. The **GridSmart™** VFD has been widely viewed as a step forward in providing customers the range of efficiency products needed to ensure fan system success.

The **GridSmart™** VFD is available from .25 to 250HP at a very competitive price. **GridSmart™** VFD's offer many benefits to the customers, most significantly, energy savings. By matching system capacity to the actual load, major savings in system motor energy use are achieved. The F510 and L510 drives provide extremely precise electrical motor control, enabling the fan system to operate at its maximum efficiency.

### Benefits:

- Reduced energy consumption & operating costs
- Optimizes fan operation to match the requirements of the system
- Competitive pricing
- Allows the fan to operate at lower speeds, extending the life of the fan and reduces maintenance
- Eliminates the need for dampers, inlet vanes and soft starters

"We are excited to be taking another innovative step forward in product line offering for Aerovent," said Trinity Persful, director of marketing, Aerovent. "Ultimately, this is about saving the customer energy and doing it at a very attractive price point."

For questions on our new **GridSmart™** VFD's, visit Aerovent's [GridSmart™ Webpage](#) or contact your local representative.
